CLINIC OF AESTHETICS

PRE & POST CARE

Hyperhidrosis

## Hyperhidrosis Aftercare

---

### PRE & POST CARE

- Treatment area may feel sore/tender for first 24 hours. Results start to be noticeable 2-4 days after treatment, full effects usually noted within 2 weeks.
- Avoid wearing antiperspirants for the first 12 hours.
- Avoid heavy exercise, sauna and steam rooms for 48 hours.
- Treatment lasts anywhere from 3-12 months.
- Symptoms of severe side allergic reactions include shortness of breath, coughing, difficulty swallowing, swelling of eyes/tongue/lips, nausea or diarrhea. Please contact us right away at (289) 668-4218 or (647) 968-4218 and/or go to your nearest emergency hospital.
